

Sigra: The Standard of Truth

Verification-First Intelligence for the Plaintiff Bar

The Hallucination Epidemic is a Professional Liability

AI SANCTIONS TIMELINE

906+ tracked hallucination cases
(Source: Charlottin Database)

CASE FILES

Mata v. Avianca

The Warning Shot. Fabrication of judicial decisions.

State v. Garrett

Sanctioned for failure to disclose AI usage and false citations.

Woodward Harbor L.L.C.

Filings struck. Default judgment entered due to bad faith AI use.

Key Insight:

Grounding is not Verification. Current tools (Westlaw, Harvey) are probabilistic guessers. They predict the next word, they do not verify the fact.

The Regulatory Hammer: Federal Rule of Evidence 707

The era of “Trust Me” is ending. The courts are demanding “Show Me”.

Proposed FRE 707 (Machine-Generated Evidence):

Evidence must satisfy Rule 702(a)-(d) regarding reliability principles and methods.

Inadmissible: Proprietary “Black Boxes” (Harvey, CoCounsel) cannot produce an audit trail of neural weights.

Admissible: Systems that prove the specific reasoning chain.

The Structural Flaw of Incumbents: Probabilistic RAG

Them (Incumbents)

Architecture: RAG + Software Checks

Security: SOC 2 (Policy-based)

Result: Plausible Text (Guessing)

Risk: Memory Dumps, Prompt Injection

Us (Sigra)

Architecture: Verification-First +
Cryptographic Proofs

Security: TEE (Physics-based)

Result: Attested Fact (Knowing)

Risk: None (Fail Closed)

“They show you what was produced. We show you what wasn’t.”

The Glass Box Revolution

We don't generate text until we verify facts.

The Standard of Truth

Trusted Execution Environments

Hardware-enforced privacy (The Vault).
Even Sigras engineers cannot see client data.

CARLA (Reasoning Ledger)

Cryptographic proof of every thought (The Receipt).
Immutable chain of custody.

Cost Lock

Predictable economics (The Business Model).
Ending the AI Tax.

Physics-Based Security: The Trusted Execution Environment

Encryption-in-Use. 0% Client Data Visibility.

Source: Sigra Specification on Encryption-in-Use and TEE Architecture.

Weaponizing Discovery: The 'Discovery Auditor'

Automating the Motion to Compel

DOCUMENTS PRODUCED

2,000,000 - Looks Complete

GAPS DETECTED

GAPS DETECTED: 1,000,000

1,000,000 - Missing Threads, Deleted Custodians

Under FRCP 37(e), you need to prove intent. Sigra shows the pattern.

The Economic Edge: 'Cost Lock'

End the AI Tax. Don't Meter the Truth.

The Old Way (Relativity/Everlaw)

Runaway Costs

Fees per GB ↗

Reasoning Tokens ↗

User Licenses ↗

Unpredictable & Variable Pricing Model

The Sigra Way

Flat Fee Per Matter

- ▶ **Unlimited L1 Scanning** (Ingest everything).
- ▶ **Capped ARTs** (Atomic Reasoning Transactions).
- ▶ **Predictable Margins** for Contingency Firms.

Certainty & Cost Control. No Hidden Variables.

Winning the Admissibility Hearing

The Roadmap to FRE 707 Compliance.

Challenge.

Defense challenges AI evidence under Daubert/FRE 702.

Production.

Sigra produces the Attested Result Object (ARO).

Proof.

Cryptographic chain proves method reliability (Rule 702c).

Admission.

Sigra: The Standard of Truth.

The New Standard of Care

The Crisis

AI
Hallucinations
& Sanctions.

The Law

FRE 707 &
Reliability
Audits.

The Solution

Sigra Glass
Box
Verification.

The Outcome

Weaponized
Discovery.

Join the Federation.
Sigra: The Standard of Truth.
